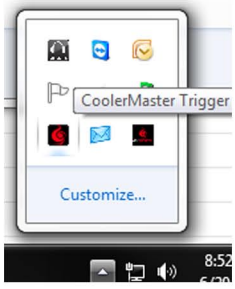
CM Storm Trigger Windows Key Setup

1) Open the Trigger software by double clicking the icon in the system tray



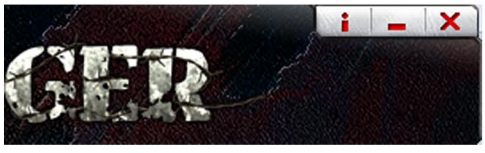
2) Choose the profile you wish to set the windows Key for

3) Click on the CM Storm Key on the software Map

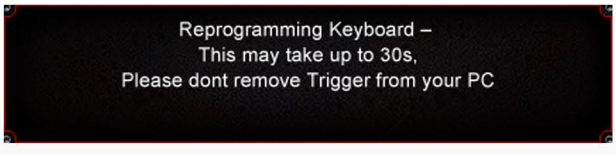
4) Click on the WIN icon under the "STORM KEY:" section

5) The key assignment will be shown to the right panel under "ALL KEY LIST"

6) Click on the X to close and update the keyboard



7) The OTM screen will count up to 9 and disappear



The key is now programmed to function as the windows key when pressed

8) Hold down the right Storm key and press ~,1,2,3,4 or 5 to select the profile you adjusted or created.

~ = default profile
1-5 = profile 1-5
